

# 6in1 448K Diathermy System

448k Thermal Energy Health Management System

# MASTER OF DEEP FEVER

448K utilizes radiofrequency current at 448KHZ to activate cells, generating motion heat energy, enhancing blood and lymphatic circulation, restoring skin elasticity, firming, and breaking down fat, improving cellulite, treating conditions like cold intolerance, inflammation, and enhancing chest contour. It also activates bodily functions, strengthens the three-dimensional structure of connective tissue, increases tissue elasticity, and promotes metabolism and tissue regeneration

# Temperature Determines Life, Aging, and Death?

When body temperature is low and energy levels are down, sub-health or disease issues may arise, leading to a decline in female fertility, slow body circulation and metabolism, nerve disorders, and inflammatory pain. All these are caused by sub-health. To bid farewell to sub-health, we can utilize the "Fever Master" device for treatment

Muscle pain

Fat accumulation

Uterine Coldness

# 8 core technologies

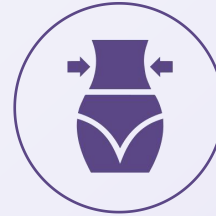

## Enhance immunity

Activate the body's self-healing mechanisms. Stimulate the vitality of immune cells and enhance the defense capabilities of the immune system

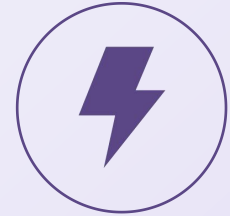

## Improving body chill

By increasing one's basal body temperature, promoting blood circulation, and warming the body from the inside out, one can enhance the body's ability to withstand cold

## Fat Management

Help dissolve and soften deep-seated, stubborn fat, and expel the fat through circulation, thereby reducing girth and weight.

## Electrical Stimulation

Balance the positive and negative charges of cells, enhance cellular activity, and help cells restore their natural functions

# 8 core technologies

## Metabolic circulation

Accelerate the body's metabolism and increase the basal metabolic rate, while also promoting cell regeneration and repair, improving skin elasticity and luster

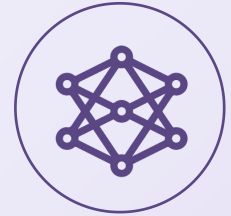

## Shoulder and Neck Massage

Specific energy conduction stimulates acupoints and meridians in the shoulder and neck area, promoting blood circulation and gradually relaxing stiff muscles

## Joint stasis dispersion

No matter if the joint stagnation is caused by sports injuries, overuse, or other reasons, the "Fever Master" can accelerate the dissipation of blood stasis, reduce swelling, and alleviate pain

## meridian dredging

Stimulate the acupoints on the meridians, activate the body's self-healing ability, promote metabolism, and eliminate toxins and impurities from the body

# CAP Handle Functionality Analysis

## Superficial Tissue CAP Mode

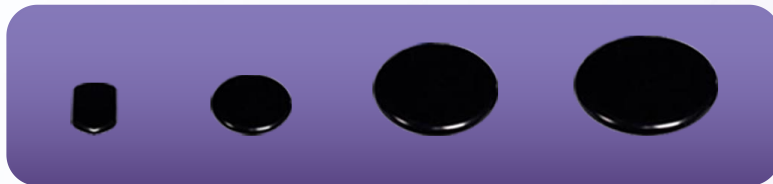

It can accelerate the growth of skin elastic fibers, stimulate the regeneration of collagen to tighten the skin, easily solve aging skin problems such as forehead wrinkles and crow's feet, address eye wrinkle concerns, and significantly lift nasolabial folds and the corners of the mouth.

Tighten the skin

Smooth out wrinkles

Restore elasticity

Humanized design with four interchangeable probes

# RES Handle Functionality Analysis

## Deep Tissue RES Mode

The friction of positive and negative ions generates deep internal heat, which dissolves fat while also accelerating the circulation and metabolism of blood and lymphatic fluid. The biological thermal effect leads to the breakdown of fat cells into free fatty acids and glycerol, which are then expelled through metabolism, achieving the effect of weight loss.

Reduce fat

Eliminate impurities

body shaping

Humanized design with four interchangeable probes

# Fascial Blade Functionality Analysis

## MG3 Fascia Blade

The heavy-duty fascia blade reaches deep muscle tissues, providing true deep massage effects on problematic tendons, muscles, ligaments, fascia, or scar tissues: it can enhance rehabilitation effects, repair muscles, and improve body pain

## P90 Fascia Blade

Featuring a lightweight design, it is easy to handle and can be used anytime, anywhere to massage the superficial fascia, restore fascial elasticity, enhance the formation of new collagen tissue to improve skin elasticity, delay aging, and reshape the face

Lymphatic Detox

Tissue Repair

Massage the fascia

# Six Major Health Management Outcomes

01

## Lipid Management

Improvement of fatty liver, Dowager's hump, hyperlipidemia, and obesity population

03

## Body Temperature Management

Increase basal body temperature and regulate acidic body constitution

05

## Immunity Management

Increase the body's basal temperature and enhance immunity

02

## Endocrine Management

"Regulating endocrine, improving uterine coldness and gynecological health

04

## Pain Management

Relieve pain, purify blood and lymphatic circulation, and enhance metabolism

06

## Aging Management

Activate the body's cells and invigorate tissue cells

# Operable Areas

Arms

Abdomen

Buttocks

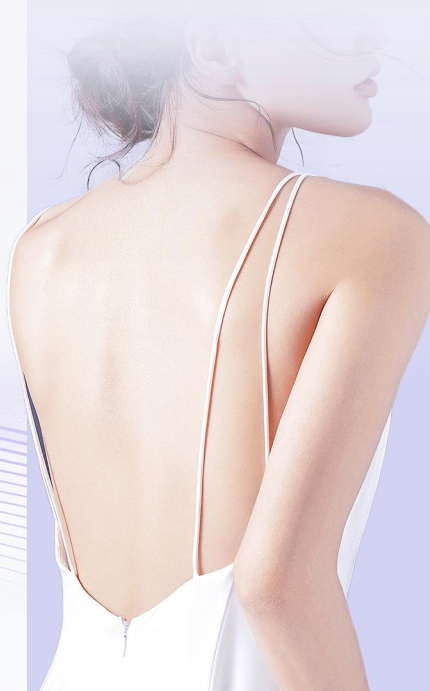

# Operable Areas
