01

## Product Functions

This is a micro-vibration pressure electric ball instrument that acts on tissues and muscles, and is a cylinder composed of multiple balls. It acts on various parts of the body by squeezing and rolling; the special "honeycomb configuration" of the balls is more in line with the ergonomic curve design, generating pulse and rhythmic movements, making operation more labor-saving, massage more powerful, and penetration more strong.

02

## Product Efficacy

1. Dredge the body meridians, regulate qi and blood, relieve muscle soreness,
2. Relieve back protrusion
3. Helps break fat deposits, reduce fat and beautify body curves
4. Massaging the abdomen can promote gastrointestinal peristalsis and help digestion
5. Tightening breasts

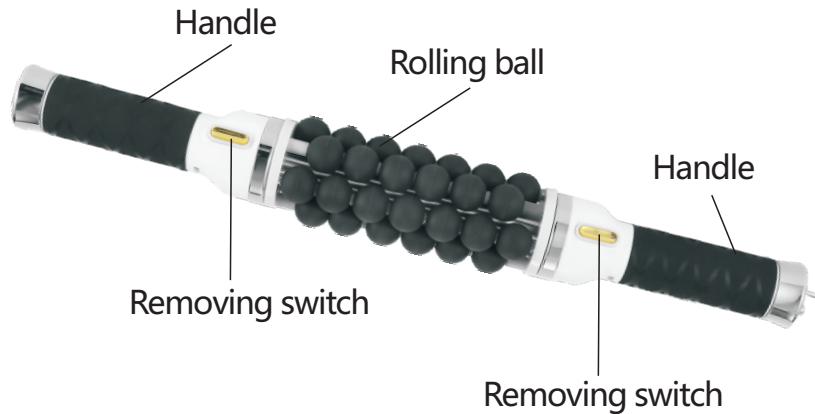

## Advantages

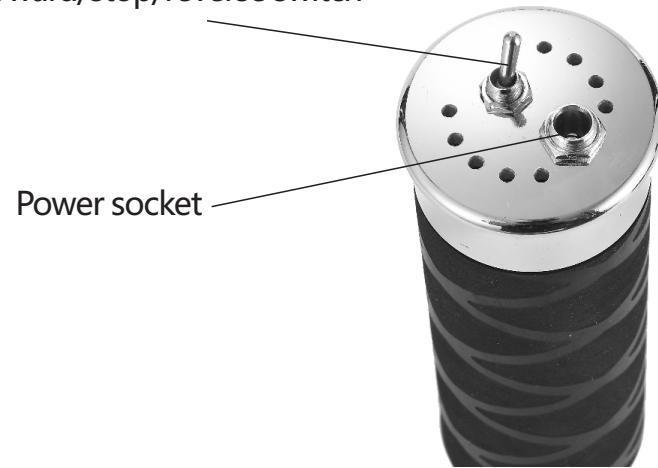

The product is a cylinder composed of 39 rolling balls (25 mm in diameter). The rotation frequency of the cylinder is 40 - 320 Hz, and the frequency is adjustable for each body part; the double handle design makes the force more uniform and the operation easier.

## Operating Instructions

Forward/stop/reverse switch

## Operating Instructions

Speed regulating adapter

(Speed up clockwise, slow down or shut down counterclockwise)

Press the switch at both ends to disassemble the honeycomb cylinder for cleaning
